

x-tention and the GDG develop and operate patient portal for mental health

- The “Curamenta” patient portal has been in operation since the autumn
- The digital health platform supports people dealing with mental health issues and their loved ones
- Curamenta offers a wide range of functions in public and closed areas and is continually being extended

Heidelberg, 9 February 2023 – The “Curamenta” patient portal, a secure and professional service for people with mental illnesses, was launched in September 2022. The three-tiered healthcare platform provides information on symptoms, diagnosis and treatment processes at [curamenta.de](https://www.curamenta.de), while a specially protected personalized area contains extensive functionality for digitally supported treatment.

The platform’s launch followed a one-year development phase. As well as collaborating on the concept work, x-tention focused on the UI/UX design of the interfaces, the development and implementation of the backend, plus the integration into existing systems. The x-tention group has been operating the patient portal since it went live. It also provides user support. The platform is funded by the four public hospital associations, Vitos (Hessen), LVR (Rhineland Regional Council), LWL (Regional Council of Westphalia-Lippe) and kbo (Clinics of Upper Bavaria), which together treat over 650,000 patients annually in Bavaria, Hessen, and North Rhine Westphalia. Under the auspices of the GDG (Non-Profit Society for Digital Health), the partners are working together to shape the digital transformation in mental healthcare.

Curamenta – the mental health portal

The patient portal is for people with mental health issues, their loved ones, and anyone else who wants to find out more about mental health. Comprehensive information on the most common conditions and their diagnosis and treatment options is available in the public area. All content is also available in a plain language version. Once users have registered and logged in to Curamenta, can use the forum and join discussions. The portal also provides further information on treatment facilities and contact addresses and offers support in managing appointments, for instance for an initial examination.

Users who have been approved as patients can benefit from the whole range of Curamenta functions. From their personal dashboard, they can access all their files, share them with treatment providers or fill in questionnaires right there in the portal. In addition, they can send direct messages to their service providers, schedule appointments or involve loved ones

in the treatment process. The online service includes a diary and note function and new features are being added all the time.

Functions go far beyond KHZG requirements

Curamenta has a wide range of value-adding features that take the pressure off service providers and hospital management, streamline processes and go beyond the obligatory and nice-to-have criteria of the KHZG (German Hospital Future Act). The digital portal is based on the Orchestra eHealth Suite. It offers accounting and onboarding functions, plus precise authorization and approval management. The integrated patient record allows you to store all the personal and medical data that is generated. Structured data is exchanged via HL7 FHIR. Service providers can use the form designer to create their own forms for gathering and storing information. The well-designed appointment organiser for coordinating appointments and the secure messaging app from x-tention partner, Famedly, which can also be used by whole teams or therapy groups, are equally useful to patients and treatment providers.

x-tention has been operating the Curamenta healthcare platform since its launch in September. At the same time it supports Curamenta by providing extensive data protection and IT security services. It also takes care of monitoring during operations. A multi-level support set-up is available around the clock for questions and any issues that arise during use. The healthcare platform was seamlessly integrated into the participating hospitals' existing systems before it went live, and hospital staff were trained in how to use Curamenta.

Curamenta homepage ([curamenta.de](https://www.curamenta.de))

Das Portal für psychische Gesundheit.

Curamenta ist ein sicheres und professionelles Angebot öffentlicher Träger und richtet sich an interessierte Erkrankte und deren Angehörige sowie die Mitarbeitenden an unseren zahlreichen Standorten. Curamenta vernetzt Nutzerinnen und Nutzer und befähigt sie, einzigartige digitale Angebote wahrzunehmen. Viele Funktionen von Curamenta stehen unmittelbar zur Verfügung, bspw. die Such-, Informations-, und Selbsttest-Funktion.

Suche
Mit der Suchfunktion finden Sie alle frei zugänglichen Inhalte auf Curamenta wie Informationen zu Krankheitsbildern, Blog Beiträge sowie die Standorte unserer Träger.
[Zur Suche >](#)

Selbsttests
Durch die anonyme Beantwortung weniger Fragen erhaschen Sie erste Anhaltspunkte, ob Sie an Symptomen einer psychischen Erkrankung leiden. Sie erhalten Empfehlungen, was Sie in diesem Fall tun können.
[Zu den Selbsttests >](#)

Informationen
Auf Curamenta finden Sie ausführliche, seriöse und neutrale Informationen zu Psychiatrie, Psychotherapie und psychischer Gesundheit – auch in Leichter Sprache.

About the GDG

Under the auspices of the Non-Profit Society for Digital Health GDG mbH (GDG), the large public funding organizations, kbo, LVR, LWL and Vitos, provide programmes around the digitalization of the healthcare sector. The GDG is a purely non-profit organization. Laura Kuhlmann is the Managing Director of the GDG.

About x-tention

“IT with care” is what the x-tention group is all about. We harmonize and integrate different IT systems in the health and social care system, enabling our clients to focus fully on their core business. Around 700 x-tention group staff at 15 locations support customers with interoperability, networking, patient portals, cybersecurity, data protection and operations. For more information, see [x-tention.com](https://www.x-tention.com).
